

BANK RECONCILIATION CASE STUDY

Evangeline Amadi | Bookkeeping & Data Entry
Simulated Practice Project • August 2026

Project Overview

This simulated project demonstrates the process of comparing a bookkeeping cash ledger with a bank statement, identifying timing or bank-side differences, and preparing an adjusted reconciliation.

Business Scenario

The business recorded several customer receipts, supplier payments and operating expenses. The bank statement contained the same core transactions but had not yet reflected a ■1,500 bank charge recorded in the books.

Reconciliation Performed

- Compared ledger transactions with bank-statement transactions using dates, descriptions and references.
- Matched customer receipts and supplier/expense payments.
- Identified a ■1,500 bank charge recorded in the books but not yet appearing on the supplied bank statement.
- Calculated the adjusted bank balance.
- Confirmed the final unreconciled difference was ■0.

Reconciliation Item	Amount
Ending book balance	■484,000
Ending bank statement balance	■485,500
Less: bank charge not yet reflected on statement	■1,500
Adjusted bank balance	■484,000
Unreconciled difference	■0

Skills Demonstrated

- Bank reconciliation
- Transaction matching
- Cashbook/ledger review
- Identification of bank-side differences
- Reconciliation adjustments
- Spreadsheet organization
- Attention to detail and quality control

Portfolio Note

This is a simulated practice project created to demonstrate bookkeeping skills. It is not presented as paid client work.
